

## Testimonial

July 13, 2011

At first I was sceptical of chiropractic treatments, but once a friend convinced me to meet with Dr. Brent Moyer, I would recommend it to anyone. I first went to the chiropractic clinic in May 2008, and met with Dr. Moyer where we set up a treatment plan for my specific needs. I had been having severe migraine like headaches two to four times per week for about two to three years prior to receiving treatments. My "cure" for this problem was resting, and taking Advil, Tylenol 3's or 700 mg Ibuprofen. After chiropractic, I noticed results almost immediately, and my headaches have dramatically reduced in frequency and severity. From a severe headache two to four times a week, I am now at a mild headache maybe every three or four months. Since treatment began I have had one severe migraine, at which point I called the clinic and was in to see Dr. Moyer for treatment later that day. By the evening I was feeling much better and by the next day everything was back to normal. Going for chiropractic treatments was one of the best decisions I have ever made. I am currently in the routine maintenance portion of my treatment, which helps to prevent future headaches. For me chiropractic treatment was the pain relief I needed without having to pop pills all the time.

Thank you Dr. Moyer,

Jamie W.
