

May 24th 2011

I have been receiving treatment from Dr. Moyer for the past month now. He has been treating my right knee. When I first came in, my knee was very tender and sore. Dr. Moyer did a Gait Analysis and looked at my alignment of my feet, ankles and knee. He said that I could definitely benefit from custom made orthotics. I have now had my orthotics for two weeks and see and feel major improvements already. While working out, my balance is better and my feet don't get sore. I am able to jog without getting shin splints. The tenderness and soreness in my right knee has gone away. I am very happy with what Dr. Moyer has done and also very thankful for him advising me to get the custom made orthotics.

Sincerely,

Sanne D.
